Exp-7a

Header

```
JS header.js ×   JS about.js   JS App.js
portfolio-react > src > JS header.js > Header
function Header() {
  return (
    <header>
      <h1>My Portfolio</h1>
      <h2>Prashant Jha</h2>
      <h3>Frontend Developer</h3>
    </header>
  );
}

export default Header;
```

About

```
portfolio-react > src > JS about.js > ...
import React, { Component } from "react";

class About extends Component {
  render() {
    return (
      <section>
        <h2>About Me</h2>
        <p>I am a passionate web developer learning React.</p>
      </section>
    );
  }
}

export default About;
```

app

```
portfolio-react > src > JS App.js > ...
import Header from "./header";
import About from "./about.js";

function App() {
  return (
    <div>
      <Header />
      <About />
    </div>
  );
}

export default App;
```

output

My Portfolio

Prashant Jha

Frontend Developer

About Me

I am a passionate web developer learning React.

Exp-7b

Profile

portfolio-react > src > JS profile.js > ...

```
function Profile(props) {
  return (
    <div>
      <h2>{props.name}</h2>
      <p>{props.role}</p>
    </div>
  );
}

export default Profile;
```

About

portfolio-react > src > JS about.js > ...

```
import React, { Component } from "react";

class About extends Component {
  render() {
    return (
      <div>
        <h3>About Me</h3>
        <p>{this.props.description}</p>
      </div>
    );
  }
}

export default About;
```

app

```
portfolio-react > src > JS App.js > App
import Profile from "./profile.js";
import About from "./about.js";

function App() {
  return (
    <div>
      <Profile
        name="Prashant Jha"
        role="Frontend Developer"
      />
      <About
        description="I enjoy building modern and interactive web applications using React."
      />
    </div>
  );
}

export default App;
```

Output

Prashant Jha

Frontend Developer

About Me

I enjoy building modern and interactive web applications using React.

Recitation

App

portfolio-react > src > JS App.js > App

```
import Hello from "./Hello";
import Student from "./Student";
import Button from "./Button";
import Header from "./Header";
import Content from "./Content";
import Footer from "./Footer";
import SPA from "./SPA";
import Message from "./Message";
import ProfileCard from "./ProfileCard";
import About from "./About";

function App() {
  return (
    <div>
      <h1>React Working ✅</h1>

      <Hello />

      <Student name="Prashant Jha" className="SE-AIML" />

      <Button text="Login" />
      <Button text="Register" />
      <Button text="Logout" />

      <Header />
      <Content />
      <Footer />

      <SPA />

      <Message text="Study React Daily" />

      <ProfileCard name="Aditya Soni" age="20" subject="Web Programming" />

      <About />
    </div>
  );
}
```

output

React Working ✅

Hello, Welcome to React!

Name: Prashant Jha

Class: SE-AIML
